

Community Fitness Program

If you've decided that now is the time to get in shape and stay in shape. The Sam B. Cook Healthplex can help you reach your fitness goals. The Healthplex offers a relaxed and friendly exercise/workout environment. What's more, all of our fitness programs are supervised and designed to meet the needs and goals of each participant.

We first schedule a health assessment and orientation. Two separate one-hour appointments are set up for you. Your medical history will be reviewed, fitness level assessed, and an exercise prescription is designed based on findings from your health assessment and your personal goals. Some members may need a physician clearance before beginning membership.

After the health assessment and orientation, you can exercise independently with fitness staff available to assist you if you need help or have a question. You may come and go as you wish with unlimited use of our facility, which includes group fitness classes. Specialty classes are available at reduced price for members.

A Full Range of Fitness Choices

Capital Region Healthplex offers a number of options for reaching your goals, ranging from state-of-the-art fitness equipment to group classes. Facility features include:
