**Promoting Access to Home Care
& Hospice Services**

Nearly 12 million
Americans now rely
on home health
care...

Medicare covers
only 3.5 million of
these

...and 78 million baby boomers are just about to retire

Science shows that baby boomers will experience higher rates of chronic illness

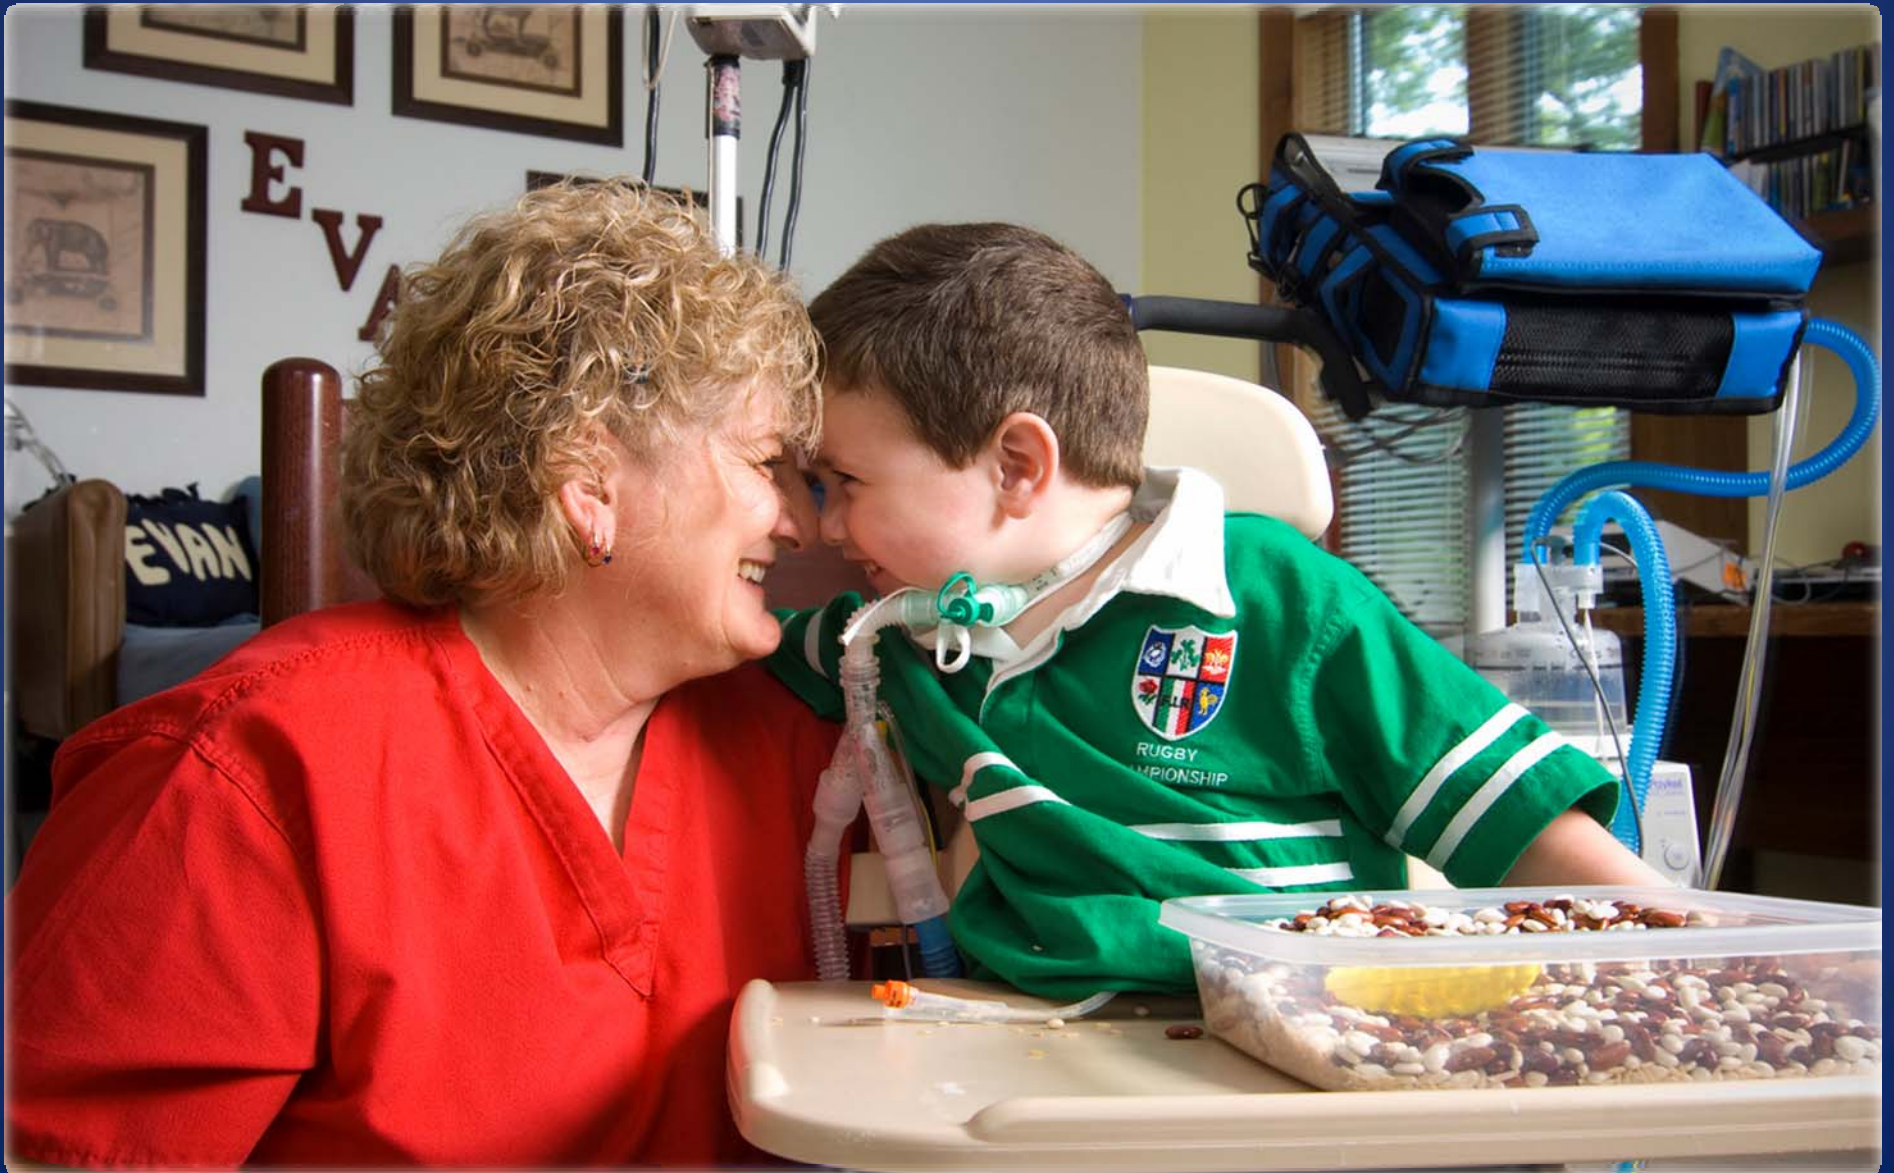

Home care is the most efficient way to manage chronic conditions

12% of Americans with chronic illnesses are responsible for 75% of U.S. health care costs

Home health care is cost-effective and saves Medicare and Medicaid billions of dollars a year

Home health care helps prevent the need for higher-cost care

The average hospital stay costs Medicare \$1,500 per visit...

While the average home-care visit costs Medicare \$150 per visit

Home health care combines efficiency with compassion

Nine out of 10
seniors
prefer home
care over
institutional
care

Home health care keeps families together, while encouraging patients' independence

Scientific evidence proves patients heal more quickly at home

Patients have reduced mortality rates and morbidity rates at home

Home health care is
high quality...

Uses state-of-the-art
technology to enhance
and extend life...

While improving the
quality of life - for both
patients and workers

Home health care
will provide many of
the most needed
jobs-
now and in the
future

“There are few more noble professions”
-President Barack Obama

He Helped US Choose Homefort
